Geoprofessions is a term coined by the Geoprofessional Business Association to connote various technical  
disciplines that involve engineering, earth and environmental services applied to below-ground  
(subsurface), ground-surface, and ground-surface-connected conditions, structures, or formations.  
The principal disciplines include, as major categories:

1 Introduction 4 CIRIA C683 1.2 BACKGROUND TO THE MANUAL In 1991 CIRIA/CUR published the original Manual on the use of rock in coastal and shoreline engineering, commonly referred to as "The Rock Manual". This was followed in 1995 by the Manual on the use of rock in hydraulic engineering by CUR. Two French reference books were

Engineering ethics is the field of system of moral principles that apply to the practice of engineering. The field examines and sets the obligations by engineers to society, to their clients, and to the profession. As a scholarly discipline, it is closely related to subjects such as the philosophy of science, the philosophy of engineering, and the ethics of technology
