International Journal of Applied Mathematics and Theoretical Physics (IJAMTP) publishes papers in the fields of applied mathematics and theoretical physics; these two fields are vital for basic sciences and engineering. The journal presents original papers, reviews and letters. The primary goal of this journal is to advance the understanding of applications in mathematics and physics by ...

Electromagnetism is a branch of physics involving the study of the electromagnetic force, a type of physical interaction that occurs between electrically charged particles. The electromagnetic force usually exhibits electromagnetic fields such as electric fields, magnetic fields, and light, and is one of the four fundamental interactions (commonly called forces) in nature.

Finite-difference time-domain or Yee's method (named after the Chinese American applied mathematician Kane S. Yee, born 1934) is a numerical analysis technique used for modeling computational electrodynamics (finding approximate solutions to the associated system of differential equations). Since it is a time-domain method, FDTD solutions can cover a wide frequency range with a single ...

An In-Home, IoT Solution for Early Dementia Detection. The number of people with dementia is projected to double by 2030. To address this issue, researchers have developed an IoT health monitoring system to identify signs of Mild Cognitive Impairment.
