

approaches to clay modelling pdf

Slope stability analysis is performed to assess the safe design of a human-made or natural slopes (e.g. embankments, road cuts, open-pit mining, excavations, landfills etc.) and the equilibrium conditions. Slope stability is the resistance of inclined surface to failure by sliding or collapsing. The main objectives of slope stability analysis are finding endangered areas, investigation of ...

Slope stability analysis - Wikipedia

Polyelectrolyte: Polymer composed of macromolecules in which a substantial portion of the constitutional units contains ionic or ionizable groups, or both. Notes: The terms polyelectrolyte, polymer electrolyte, and polymeric electrolyte should not be confused with the term solid polymer electrolyte.

Nanowire arrays of SnS/SnS₂ p-n heterojunctions are grown on transparent indium tin oxide (ITO) coated-glass and Si/SiO₂ substrates via chemical vapor transport (CVT). The nanowire arrays are comprised of individual SnS/SnS₂ heterostructures that are highly oriented with their lengths and morphologies controlled by the CVT conditions (i.e. reaction temperature, flow rate, and reaction time).
