Magnetometers used in geophysical survey may use a single sensor to measure the total magnetic field strength, or may use two (sometimes more) spatially separated sensors to measure the gradient of the magnetic field (the difference between the sensors). In most archaeological applications the latter (gradiometer) configuration is preferred because it provides better resolution of small, near ...

At the time of writing, post-processing of the 2015 data was incomplete and only limited areas were available for analysis. Nonetheless, as with the 2012 ALS campaign completed by KALC, the available new data from CALI illustrate, confirm and expand upon a range of long-held and well-established assumptions about archaeological landscapes from conventional studies.

NDAS was established in 1959, and for many years concentrated on providing lectures and visits for members. The society merged with North Devon Rescue, a campaigning organisation which had been instrumental in ensuring proper recording and excavation in the area, particularly during Barnstaple's major redevelopment in the 1980s.
