To the best of our knowledge, our solution is the first one that takes the patient's condition and data content into account in wireless healthcare networks. In [14], MEDiSN, a system for vital sign monitoring of ambulatory patients, is proposed and evaluated using empirical experiments in the emergency room.

This report is available from the Arctic Inventory and Monitoring Network's Caribou Vital Signs

### National Park Service

The Arctic is changing faster than anywhere else on the planet. Vegetation is changing through longer and warmer growing seasons and in response to the extent and severity of fires. Hydrology is changing because of thawing permafrost, snowpack persistence, and the freezing and thawing of lakes and streams.

Abstract. To protect important resources under their bureau's purview, the United States National Park Service's (NPS) Arctic Network (ARCN) has developed a series of "vital signs" that are to be periodically monitored. One of these vital signs focuses on wet and dry deposition of atmospheric chemicals and further,...
