Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

With few exceptions, I would bet that most teachers feel they could be doing a better job of differentiating instruction. It's not that we don't want to do it—we know our students learn at different rates, that some need more help and others could be moving much more quickly than we let them. The problem for many of us is that we just can't figure out how to manage it.
