

recent developments in space pdf

Geant 4 is a software toolkit for the simulation of the passage of particles through matter. It is used by a large number of experiments and projects in a variety of application domains, including high energy physics, astrophysics and space science, medical physics and radiation protection.

Recent developments in Geant4 - ScienceDirect

Efficient vertical mobility is a critical component of tall building development and construction. This paper investigates recent advances in elevator technology and examines their impact on tall building development. It maps out, organizes, and collates complex and scattered information on multiple aspects of elevator design, and presents them in an accessible and non-technical discourse.

Life Cycle Assessment is a tool to assess the environmental impacts and resources used throughout a product's life cycle, i.e., from raw material acquisition, via production and use phases, to waste management.

Recent developments in Life Cycle Assessment - ScienceDirect

Many modern towns and cities throughout Europe recognise that providing space for cycling creates efficient and attractive places to live. They experience the benefits that this brings, in terms of attractive streetscapes, economic use of land, simplicity of moving around, and healthy lifestyles.

Making Space for Cycling - A guide for new developments

Space tourism is space travel for recreational, leisure or business [citation needed] purposes. There are several different types of space tourism, including orbital, suborbital and lunar space tourism. To date, orbital space tourism has been performed only by the Russian Space Agency. [citation needed] Work also continues towards developing suborbital space tourism vehicles.
