No hard-and-fast definition of what a scripting language is exists, but generally scripting languages are interpreted programming languages that feature higher productivity than more traditional systems languages like Java, C++, C, or COBOL. A line of code in a scripting language typically does more than a line of code in a traditional systems language.

URLs and URNs. A Uniform Resource Name (URN) is a URI that identifies a resource by name in a particular namespace. A URN may be used to talk about a resource without implying its location or how to access it. For example, in the International Standard Book Number (ISBN) system, ISBN 0-486-27557-4 identifies a specific edition of Shakespeare's play Romeo and Juliet.
