**Introduction to Tensor Calculus, Relativity and Cosmology**

Control theory in control systems engineering is a subfield of mathematics that deals with the control of  
continuously operating dynamical systems in engineered processes and machines. The objective is to  
develop a control model for controlling such systems using a control action in an optimum manner without  
delay or overshoot and ensuring control stability.

Automation is the technology by which a process or procedure is performed with minimum human assistance.  
Automation or automatic control is the use of various control systems for operating equipment such as  
machinery, processes in factories, boilers and heat treating ovens, switching on telephone networks, steering  
and stabilization of ships, aircraft and other applications and vehicles with ...
