The High-Resolution Site Characterization (HRSC) Focus Area reflects the state-of-the-science for environmental site characterization. HRSC strategies and technologies use scale-appropriate measurement and data density to delineate contaminant distributions in environmental media with greater certainty, supporting faster and more effective remedy selection, design and implementation.

by Melanie Neumeier, RN. Masters of Nursing Student, Memorial University of Newfoundland and Labrador. Abstract. The high incidence of preventable medical errors in health care is a key factor that has led to pressure on health care organizations to implement electronic medical records (EMRs) as a means to mitigate the issues antecedent to these adverse outcomes.
