Mechatronics, which is also called mechatronic engineering, is a multidisciplinary branch of engineering that focuses on the engineering of both electrical and mechanical systems, and also includes a combination of robotics, electronics, computer, telecommunications, systems, control, and product engineering. As technology advances over time, various subfields of engineering have succeeded in ...

Design of gating, feeding system and simulation was performed in Auto-CAST X1 software, which is shown as a diagrammatic representation (). First, wear plate part was made in Pro-E modeling software and then it was imported into Auto-CAST X1 casting simulation Software for designing of gating and feeding system.
